Index to volume 24 (1986)

No 1 (January) pp 1–56

No 2 (March) pp 57–112

No 3 (May) pp 113–176

No 4 (July) pp 177–240

No 5 (September) pp 241–304

No 6 (November) pp 305–376

Articles

Accelerated fretting wear testing using ultrasonics
Söderberg, S., Nikoonezhad, D., Salama, K. and Vingsbo, O. 348

Accuracy of a pulse-echo boundary tomogram
Archer-Hall, J.A. and Walker, T.J. 36

Acoustic cavitation in low-temperature liquids
Akulichev, V.A. 8

Acoustic emission monitoring of strength in brittle materials
Likhatsi, S.I. and Nicholski, S.G. 31

Acoustic refraction of off-axis shear horizontal waves in slightly anisotropic plates
Clark, Jr, A.V. and Delsanto, P.P. 25

Acoustic scattering from cylindrical shells. Guided waves and resonances of the liquid column
Maze, G., Izbicki, J.L. and Ripoche, J. 354

Adaptive filtering for reduction of speckle in ultrasonic pulse-echo images
Bamber, J.C. and Daft, C. 41

Angular dependent ultrasonic wave velocities in aggregates of hexagonal crystals
Sayers, C.M. 289

Application of delay domain analysis to sediment identification
Woodward, A. and Coates, R. 201

Attenuation of ultrasound in *post rigor* bovine skeletal muscle
Shore, D., Woods, M.O. and Miles, C.A. ..81

Broad-band single pulse technique for ultrasound absorption studies of aqueous solutions in the frequency range 200kHz–1 MHz
Barnes, C., Evans, J.A. and Lewis, T.J. 267

Cavitation bubble dynamics studied by high speed photography and holography: part two
Lauterborn, W. and Hentschel, W. 59

Characterization of biological media by means of their non-linearity
Björnö, L. 254

Characterization of lead zirconate titanate ceramics using surface acoustic wave
Jen, C.K., Cielo, P., Maldague, X., Adler, E.L. and Shapiro, G. 133

Characterization of residual stress and texture in cast steel railroad wheels
Clark, Jr, A.V., Fukuoka, H., Mitrakovic, D.V. and Moulder, J.C. 281

Design, manufacture and performance of narrow-band ultrasonic immersion probes for multiple frequency operation in the range 3–170 MHz
Shorter, S.C. and Bridge, B. 117

Development of non-destructive bond monitoring techniques for ultrasonic bonders
Bilgutay, N.M., Li Xing and McBrearty, M. 307

Directional single-element underwater acoustic projector
Montero de Espinosa, F. and Gallego-Juarez, J.A. 100

Effect of ultrasound on ammonium leaching of zinc from galmei ore
Slaczka, A. St. 53

Effect of viscoelastic losses on resonance radiation from imperfections
Parnes, R. and Beltzer, A.I. 189

Electrochemical evaluation of ultrasonic cleaning: the Galvani potential
McQueen, D.H. and Allard, B. 49

Enhancement of an Ullmann coupling reaction induced by ultrasound
Lindley, J., Lorimer, J.P. and Mason, T.J. 292

Estimation of acoustic attenuation in liver using one megabyte of data and the zero-crossings technique
Duerinckx, A.J., Ferrari, L.A., Hoefs, J.C., Sankar, P.V., Fleming, D. and Cole-Beuglet, C. 325

Evaluation of the texture of polycrystalline aggregate from ultrasonic measurements
Lewandowski, J. 73

Evidence for sound absorption in emulsions due to differing thermal properties of the two phases
Javanaud, C., Lond, P. and Rahalkar, R.R. 137

Fluid pressure measurement using bubbles insonified by two frequencies
Shankar, P.M., Chapelon, Y.J. and Newhouse, V.L. 333

Frequency dependence of ultrasonic cleaning
McQueen, D.H. 273

Hypersonic properties of undoped and Cr-doped bismuth germanium oxide
Krzesinska, M. 88

In vivo measurement of attenuation
Ferrari, L., Jones, J.P. and Gonzalez, V.M. 66

Mathematical modelling of ultrasonic wave scattering by subsurface cracks
Achenbach, J.D., Lin, W. and Keer, L.M. 207

Measurements on batch produced miniature ceramic ultrasonic hydrophones
Filmore, P.R. and Chivers, R.C. 216

Monolithic phased array for the transmission of ultrasound in NDT ultrasonics
McNab, A. and Stumpf, I. 148

NDT of ords and pipes using shear wave caustics
Moshfeghi, M. 19

New dual-sweep receiver for CTFM sonar
Do, M.A. 179

Non-linear oscillations of gas bubbles in viscoelastic fluids
Shima, A., Tsujino, T. and Nanjo, H. . 142

On the relationship between velocity distribution and power spectrum of scattered radiation in Doppler ultrasound measurements on moving suspensions
Williams, R.P. 197

Parametric instability in n-type piezoelectric semiconductor plasmas
Ghosh, S. and Khan, S. 93

PZT ultrasonic pump
Wang, W. and Carter, R. 105

Transducers in medical ultrasound. Part 4: transducer safety
Wells, P.N.T., de Jong, N., Bom, N. and Somer, J. 230

Ultrasonic beam profiles and beam propagation in an austenitic weld using a theoretical ray tracing model
Ogilvy, J.A. 337

Ultrasound speed and attenuation in homogenates of bovine skeletal muscle
Woods, M.O. and Miles, C.A. 260

Underwater acoustic transmission of low-rate digital data
Brock, D.C., Bateman, S.C. and Woodward, B. 183

Unified mechanism for experiments on ultrasonic field visualization
Pittlinger, D.A., Stephanis, C.G. and Boudouris, G.O. 45

Use of ultrasound in chemical synthesis
Mason, T.J. 245

Using a block diagram approach for the evaluation of electrical loading effects on piezoelectric reception
Hayward, G. 156

Vibration characteristics of the Mk II Fokker bond tester probe
Guyott, C.C.H., Cawley, P. and Adams, R.D. 318

Wideband acoustic absorption characteristics of rubberized coir for underwater applications
Saseendran Pillai, P.R. 363

Keywords

Absorption
single pulse techniques, aqueous solutions 267
underwater acoustics, rubberized coir. 363

Acoustic birefringence
shear waves, stress measurement 25

Acoustic emission
NDT, resonance radiation, viscoelasticity 189
strength monitoring 31
